*Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 19 and 22, drawn to a protective film formed on a distal end of a slider having a thin-film element positioned outside and between recesses, wherein the recesses are formed within a width of a slider rail, classified in class 360, subclass 236.5.
- II. Claims 20, 21 and 23-26, drawn to a protective film formed on a distal end of a slider having a thin-film element, wherein the protective film includes a side surface generally perpendicular to a flying surface with a recess (in the side surface), classified in class 360, subclass 236.7.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a magnetic head slider having a protective film with a side recess (V-shape) as set forth in claims 20, 21 and 23-26. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2652

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
